

J. C. MARTIN, Editor.

WEDNESDAY, MAY 25, 1887.

EDITORIAL NOTES.

Silver is quoted at .94 1/2; lead \$4.50. Carp are said to be abundant in the Colorado river.

Major Ben: Perley Poore is seriously ill in Washington.

Sullivan has agreed to fight Jake Kilrain for \$5,000.

The Virginia state senate has refused to pass the reorganization act.

The \$75,000,000 fortune of the Sands family is yet to be divided among the heirs.

Henry George is getting his party organized for business in the next campaign in New York.

Ex-Governor Smith, (Extra Billy,) of Virginia, died a few days since, at the age of ninety years.

The Illinois legislature has passed a law making marriage between first cousins incestuous and void.

The American sugar refinery has sent two million pounds of sugar to New York over the Canadian Pacific from San Francisco.

General Simon B. Buckner, who surrendered Fort Donelson to General Grant, has been nominated for governor of Kentucky.

The inter-state commerce commission will not interfere with the enforcement of the long and short haul section of the railroad law.

Queen Victoria, the Marquis of Lorne and Princess Louise visited Buffalo Bill's Wild West show at London. The queen applauded the performance.

David Regensberger, assistant district attorney of San Francisco, fell through an elevator shaft, breaking his neck, on Tuesday.

Articles of incorporation for 1,680 miles of new railroad and telegraph lines in New Mexico have been filed with the territorial secretary of that territory.

On account of his numerous respites of murderers, Governor Ross, of New Mexico, has been dubbed the "gubernatorial uncertainty" by the New Mexico press.

A prominent citizen of Atlanta, Ga., has been caught selling whisky, and placed under heavy bonds. Those Atlanta folks propose to enforce the law to the letter.

The lines between Chicago and the Missouri river have refused to take part in any low rate arrangement for the fall season, thus blocking the trans-continental scheme.

The Kansas City Times calls its baseball club "the alleged Kansas City Ball Club." Missouri newspapers don't think much of a nine's play unless it makes thirty or forty runs and kills an umpire.

The Flagstaff Champion announces that the Catholic church has forbidden its priests to perform any marriage ceremonies until the law enacted by the last legislature is published and its provisions understood.

William O'Brien, editor of the United Ireland, has been elected without opposition to a seat in the house of commons, for the northeast division of Cork, made vacant by the resignation of Edmund Leary.

H. Schell, of Temperance Colony, Fresno county, California, has the glanders. He caught the disease by treating a number of horses afflicted with it. It is an infectious and extremely fatal disease.

The Albuquerque Democrat and St. Johns Herald, both democratic papers, are paying their respects to Gov. Zule's appointee, Thomas Gates, of the territorial prison. The most serious charge made is that of showing favoritism.

Some man, evidently suffering from a disordered liver, has defined medicine to be that art or science of amusing a sick man with frivolous speculations about his disorder, and of temporizing ingeniously till nature either kills or cures him.

An American by the name of Gall, recently purchased, at the sale of the crown jewels of France, a sapphire of brilliant for 132,500 francs. There are but few things that American gall can't coral.

The demise of the Tombstone Democrat is reported by the Epitaph. Cochise county democracy could not stomach Bracewell's abject devotion of facts concerning the Fourteenth legislative assembly and the man who turned the crank for that body.

Yuma county is rapidly coming to the front, on account of its agricultural resources. A number of irrigation enterprises are now well under way there, while others are projected, which will bring several thousand acres of land under cultivation. As a fruit growing section, it cannot be surpassed.

The cattlemen in Colorado and New Mexico have formed a rather strong monopoly for the shipping of fresh beef to eastern markets. They have organized a syndicate with \$25,000,000 capital, and propose to do away with "middle men."

The Cuban home rulers have notified the Spanish government that unless it promptly found means to improve the prospect of the Spanish West Indies, granting the liberty demanded by the creoles, it would find itself unable to check the Cuban movement in favor of annexation to America.

The American Magazine says: "It will probably be news to most readers outside of Wisconsin to be told that three-fourths of all the cranberries eaten with the Thanksgiving turkey are produced in that state." The methods of growing the berries on a large scale, and the picturesque scenes of picking and harvesting, form the subject of an article by G. O. Shields, of Chicago, in the June number of the American.

Assistant Secretary Maynard has decided that it is in violation of the law against importing labor under contract to hire persons residing in Canada to work in this country, and who cross the suspension bridge morning and night in going to and returning from their work.

Governor F. A. Tittle, while in Phoenix, expressed himself pleased with the progress of the valley during the past few months. At the same time he told the Herald man the whole truth and nothing but the truth when he stated that the outlook for Yavapai county was never more promising than at present.

The plans of the new Del Monte hotel, at Monterey, California, have been completed and approved by Senator Stanford, Charles Crocker and Colonel C. F. Crocker. The architecture and proportions of the building have been reproduced in the new design. It will be 350 feet long by 110 feet wide, and three stories high, with a central tower 85 feet in height.

Attorney General Goodrich has rendered an opinion in the matter of the payment of \$600 each to the chief justice and associate justice of the supreme court of this territory. His opinion is in favor of the payment of that amount and as a natural consequence at variance with the opinion of Governor Zuleick in his veto of the judges salary bill at the last session of the legislature.

The senseless tirades kept up by the editor of the late Tombstone Democrat has aroused the ire of Judge Robertson, of Gila county, who publishes a letter in the Silver Belt, in which he says that he "will turn loose the bulldogs of war in due time." Judge Robertson was a member of the council of the Fourteenth Legislative assembly, and was one of the low democratic members who preserved his independence and manhood by ignoring the party lash when applied for other than partisan purposes.

John Boyd of Grand Rapids Michigan, while drunk some time since deliberately murdered W. B. Johnson also half-crazed by liquor. He was convicted of murder and sentenced to prison for life leaving a wife and four children, the youngest but three days old. Annice Boyd, wife of the murderer, sued Christopher Post, a saloon keeper at Rockford, for selling her husband liquor, claiming \$20,000. A verdict has been rendered giving the woman \$9,500.

Another train robbery by "green hands" has taken place, this time on the Missouri Pacific railroad, at McNeill Station, Texas. As usual, the "green hands" got away with several thousand dollars. The announcement was made that the robbery which occurred in this territory nearly a month ago was done by green hands. As no trace has been discovered of them, and as no clue has been obtained of the Texas robbers, it would seem that "green hands" were eminently successful in this line.

The imprint of all the democratic papers in the territory impressed on the printed, rough, daily minutes of the Fourteenth legislative assembly can never make journals out of them, and can never alter the cold facts, which are known by every member of the last legislature, and by its chief clerks and every other attaché of that body, as well as by every one who was at all familiar with the proceedings of that body, that is that no journals were kept of its proceedings. No one has ever denied that the chief clerks kept rough daily minutes of the proceedings.

Lieutenant Cushing, of the Smithsonian Institution, at Washington, has recently unearthed an ancient temple with in three miles of Tempe, Maricopa county, which was found entombed the remains of three hundred being, amongst which was one of a child with the image of a dog beside it. The skeletons are in a state of perfect preservation, and so are the many objects of pottery which the priests used in their worship. The age of the ruins date back probably 1,700 years. Mr. Cushing considers it a very valuable one.

The New York Commercial Advertiser says an organization is being effected among certain capitalists of that city to trade in silver certificates the same as gold and common certificates are now dealt in. The head center of the organization will be the New Western National bank, of which ex-Secretary of the Treasury Manning and ex-Treasurer Jordan are the founders. Manning and his associates planned to make New York the chief center of the bullion trade, and thus transfer the continental market from London to New York. Their plan of operations is to have silver bullion in large quantities deposited with the Western National bank or elsewhere, issue certificates against the bullion so deposited, and have these certificates trade in volume very much as grain certificates are in Chicago.

A number of "squibs" have appeared in a local paper here intimating that the Ayer Lumber company, of Flagstaff, have been cutting timber unlawfully, on government land. Numerous complaints to the same effect have been forwarded to Washington, and thence returned to S. B. Bevans, special agent of the department, for investigation. Mr. Bevans will at once institute a rigid investigation of the charges, and authorizes us to state that any who are cognizant of any violation of law by the above company will be paid liberal per diem, and all expenses if they will accompany him to Flagstaff and show up such violations. Mr. Bevans seems very earnest in the matter and, proposes to probe these charges to the bottom, and if the company is guilty, determine this fact, and, if not, exonerate them.

The rainfall and water supply of this section of Arizona is ample for agricultural, grazing and mining purposes, if the means for storage is only supplied. Nature is lavish with its supply of water and has formed the most tempting canyons for the construction of dams for its storage, and, only invites man to do his part. There are thousands of acres of the richest land, in Yavapai county, which could be made to produce not only sufficient grain for home consumption, but, grain for export, if a system of water storage, for irrigation were inaugurated. There are also rich placer workings, which, when worked, gives the most remunerative returns, and which, with utilizing the water, by storage, could be worked a greater portion of the year than would pay handsome profits on the investment. One of the largest water storage enterprises, ever inaugurated, is now being built in this county, and, when pushed through to completion and the feasibility of such enterprises fully demonstrated will be followed up by others.

The management of the Atlantic & Pacific railroad has at last been brought to realize the false economy of trying to run its road with an inferior force of men to look after its repair, and have set to work to remedy it. It is said that the number of section men have recently been more than doubled, and the work of putting the road in thorough repair is being actively pushed. For the safety of its passengers, as well as for the prosperity of the road, we are glad to chronicle this fact. The road-bed itself is one of the finest, if not the very best and most solid, of any road west of the Missouri. The route, in connection with the Santa Fe, is the shortest transcontinental line between east and west, while it possesses the advantage of never becoming snow-blockaded, and is absolutely the "all the year route." With its being kept in good repair, enabling good time to be made in safety, it is bound to become the popular route. Another advantage it possesses is its railroad connection with Prescott, the capital of Arizona, and the healthiest city in the United States.

The Tombstone Epitaph is the most flexibly edited paper in Arizona. Its inconsistencies would bring a blush to shame to the cheek of Frank Pixley, one of the most forcible writers in the United States, but also one of the most inconsistent of the present period. The Epitaph has indulged in the most bitter denunciation and abuse of Governor Zuleick, descending from legitimate criticism of his official actions to the most pointed personalities, showing up his personal delinquencies in connection with the Nacozari mining operations and other questions of a purely personal character, which no other paper in the territory would publish. Having recently said something favorable to him, the governor rewarded it by authorizing the publication in its columns, an advertisement of a reward offered, since when it "bends the supple knee that thrift may follow tawnying," and in most piteous and plaintive tones bewails and bemoans the fact that certain papers yet dare to criticize his actions, and in its false praise and flattery of him, stamps as falsehood all that it has ever heretofore said concerning him. Since its self-confession of falsehood, previously, the readers of that flexibly edited journal will be at a loss hereafter to know what to believe and what to doubt, that appears as original in its columns.

The Religious Status of the World
As to religion, the 1,450,000,000 of individuals on earth are divided in the order of numerical strength, as follows: Eight hundred and sixty millions are pagans, comprising 600,000,000 Brahmins, Buddhists, or Brahmans or Buddhists; 160,000,000 of unclassified pagans; 130,000,000 of Parsees, Confucianists, Shintoists, Jains and other pagan sects; 225,000,000 of Roman Catholics, 75,000,000 of the Greek church, and 12,000,000 Protestants; 180,000,000 Mohammedans; 8,000,000 Jews. The 860,000,000 of pagans are found chiefly in Asia and Africa, and comprise 99-100ths of the population, with scattering millions in the Americas and islands of the seas. The 410,000,000 Christians constitute the body of Europe and nine-tenths of the Americas, with a few millions in Asia and Africa and the islands. The Mohammedans are chiefly in Asia and Africa. The Jews are scattered in all lands, without a home or country. This is, approximately, a correct cast of the religious status of the world to-day. It shows two-thirds of the whole to be pagan, or, including the Mohammedans and Jews as anti-Christian components of the pagan fraction, three-quarters of the whole. The remaining fraction—a little more than a quarter—Christian, of which fraction more than one-half is Roman Catholic, one-quarter (nearly) Greek, a little over a quarter Protestant.—Ex.

A True Friend of Prescott.
Gov. F. A. Tittle, who has not visited our section for some time, expresses himself as surprised and more than pleased at the enterprise and activity everywhere apparent throughout Salt River valley. But while praising our successful efforts to ride the crest of the wave, he says that Prescott among the pines, is not one whit behind us in hopes and efforts. When told that there were still old silurians in Phenix who predicted that the railroad would kill the town, he laughed heartily, and said that Prescott was a living example of the falsity of such a proposition. Her little railroad is continually bringing in capitalists who rarely leave without investing, and this year shows more interest and activity among the mines than any previous year in the history of Prescott. Mining properties, both large and small

are continually changing hands, and when the Governor left, there was not an idle man in Prescott for all chelidiers or owners were out in the hills on their properties, and all laboring men were getting good pay on some of the 1,000 mines which pay tribute to Prescott. It is not difficult to see that for the introduction of this happy era, Prescott, and with her Arizona, is indebted to that progressive legislation of the Thirteenth, which aimed to encourage, not only immigration, but also all facilities which would enable travelers, tourists and capitalists to view the country to advantage.—Herald.

NEWS, NOTES AND COMMENTS.
Santa Fe is boring for artesian water. Saturday is observed as a half holiday in New York.
More smallpox arrived in San Francisco from China.
Two thousand brick makers are on a strike, at Pittsburgh.
Henry George is opposed to Blaine for president.
Chas. Duane, a celebrated California pioneer, is dead.
The Orangemen, of Kingston, Canada stoned Editor O'Brien.
It is said that 15,000 men are idle in Chicago on account of strikes.
Fraudulent school bonds of Lincoln county, Neb., are in circulation in the east.
Two hundred and sixty-two pairs of twins were born in Chicago during 1886.
Samuel Paeo has been elected United States senator from Florida to succeed Jones.
Orangemen, of Ontario, Canada, attempted to mob O'Brien, of the United Ireland.
Mrs. General Grant is reported seriously ill with a malignant type of dyspepsia.
Denver capital to have formed a company with \$100,000 capital to operate in cattle and trout in Honduras.
Susanna Medora Salter is the name of the new mayor of Anson, Kan. She is the wife of a successful lawyer.
The president has appointed Major J. L. Rathbone, of California, to be consul general of the United States at Paris.
It is proposed to hold at St. Louis a reunion of the surviving war governors of the states which did not secede.
The Star thinks it is doubtful if enough of the so-called revised statutes of Arizona will be called in Arizona to pay for the binding.
The Chinese in New York have organized into the Knights of Labor assembly and are accepted by the order.
Isaac S. Tappins, a colored man, has been chosen mayor of Rendville, Ohio, the first of his race to hold the position in that state.
Ex-Speaker John S. Keer, who shot his brother for seducing his wife, has been exonerated by the grand jury at Rawlins, Wyo.
C. W. Smith, first vice president of the Santa Fe company, has resigned as active general manager of its system of railroads.
The two New Mexico murderers, who were to be hanged today, have been granted another respite of thirty days by U. S. circuit court.
A fourteen-year-old boy named, James Mannix, was blown to pieces on the Colorado Midland railroad recently by an explosion of giant powder.
The citizen claims that earthquakes are not new to the Apache Indians in this territory but that they were on the lookout for the recent one and had deserted their "wickiups."

The Achinson, Topeka & Santa Fe railroad has been for some time been troubled by indelicately stealing of railroad ties in New Mexico and has at last caught the thieves.
Sarah Field, a Delaware Indian has been sentenced to be hanged Aug. 12, for the murder of her daughter's illegitimate child at Vinita, I. T.
A boy fourteen years of age in Alden, Michigan, last week shot his twelve-year-old sister, saying as he fired "she won't love me any more."
Old San Pablo, the oldest chief of the Jicarillas, died at Fort Sumner, New Mexico on the 11th inst., while en route with his tribe to the Rio Arriba reservation.

A. L. Thiel, an old citizen of Chico, Cal., while out hunting, tried to draw his gun through the fence, when the hammer caught on some weeds discharging his load into his breast, killing him instantly.
A Salina, Kansas, druggist who is selling liquor under the new law has been in less than thirty days, over 2,200 affidavits, in other words he has sold over seventy drinks a day.
While out gunning near Leadville, Eddy Parker shot himself through the head with a rifle. He was looking into the gun happened to be fired.
A freight car was left at an Illinois depot by a north-bound train. It was marked "perishable goods." When the agent opened the door after the departure of the train out walked four tramps.
It is about a year since the anarchists killed, with their bomb in Chicago, seven policemen and now, says the press at the end of the year eleven more find themselves crippled for life, and twelve unable for duty.
Swan Brothers, well known both in Europe and America as the millionaire cattle dealers, of Wyoming, have made an assignment. Liabilities stated to be \$400,000; assets not estimated.
At Youngstown, Ohio, last Tuesday, after considerable delay, a sheet of tin plate, the first ever made in the United States, was successfully manufactured at the Hubbard Tinning company.
Eighty-five bodies of the victims of colliery disaster near Sidney, New South Wales, have been recovered. The

inquest resulted in a verdict that the explosion was due to a disregard of rules prohibiting the miners working where gas existed.
Barnum has received \$5,000 in cash and a free pass for his entire circus for the year 1887 over the Grand Trunk railroad for the killing of his elephant, Jumbo.
At Oroville, Cal., as Wm. Allen was being examined on a charge of larceny, he suddenly drew a revolver and shot at Col. A. P. Frary, the principal witness against him. The ball struck Frary in the breast, but was deflected by his heavy clothing and made but a slight wound.
Dan Rice, the old clown, indignantly denies that he is either a drunkard or a poor man. He says: "If I own 30,000 acres of land in Texas and New Mexico, and 1,000 in Calhoun county, Miss., and 1,000 in Lincoln county, Ark., is to be abjectly poor, then I am poor indeed."

Andrejushkianoff, Assianoff, Guerniff, Shewgoff and Ujanoff Russian nihilists have been executed for an attempt to assassinate the Czar, or in other words they have been forced to "Shuffle off."

Mulhall, the noted statistician, tells the story of Ireland thus: "During Victoria's reign there has died of starvation in Ireland 1,225,000 people; there has been evicted for non-payment of rents 3,365,000, and there have emigrated, 4,185,000."

The treasury department is building a new vault at Washington fifty-one by ninety feet in extent and twelve feet thick. The walls are to be of solid brick four feet thick. It will be the largest money vault in the world, and capable of holding \$100,000,000 silver dollars.

Arizona's Grant Savior.

According to the Courier Governor Zuleick has again just "saved Arizona," (sic), by writing a letter to the interior department, from having Garosino and his band armed with new Chassepot shotguns, knives, etc., and a lot of other chargers, turned loose upon the inhabitants, with their bellies full of government crackers and corned beef. The letter was very "timely" after the matter had been discussed all over the United States by the press, and while there was no intention of taking the Apaches out of Florida; in fact, it was sufficiently timely to reach the department after the report of the commission on the Florida Apaches had been disposed of, as well as the Apaches themselves. The governor has been "saving Arizona" ever since he has been here. He saved it by attempting to have an armed force sent into the territory to prevent the helpless settlers from protecting themselves from the Apaches. He saved it by sleeping on the hills of Cochise with "Winchester for a bride"; he saved it by being an "old resident" when he filed his application for governor of Arizona; he saved it by vetoing bills in the legislature which he recommended should be passed, and encouraged while on their passage; he saved it by attempting to destroy the credit of Arizona abroad both by dispatches and letters, and thus causing a great loss to the territory in the sale of bonds; he saved it by becoming suddenly moral and vetoing a lottery bill with one hand while he approved with the other and stud poker with the other; he saved it by stooping to a fraud upon the people to put his henchmen into office who could not be put there honestly and openly; he saved it by attempting to secure from the legislature an appropriation to pay personal expenses incurred from political and demagogic purposes; he saved it by disgracing the high position he was expected to occupy till he has become the butt of the sneers of the entire territory; he has saved it by a violation of the laws of the United States in appointing members of the legislature to offices emoluments of which they were instrumental in increasing and while they were yet members of that legislature; he saved it by having his picture and "great moral view" published in the California Rural Press along side of a homiletic on boiled squash; he saved it by attempted political trickery so base that his own partisans would not support him in it; and as his nature seems to run so strongly to salvation he will probably save Arizona the humiliation of his occupancy much longer.—Herald.

Two large gold mines have been opened by the earthquakes in the Santa Catalina mountains. Some of these days an enterprising earthquake in Arizona will open a dry goods store or a barber shop.—Philadelphia News.

The Epitaph is boasting Mark Smith up for a second term. Mark is a good man, we do not and never did question his capabilities, but we do believe in allowing him to serve one term before entering upon a second.—Citizen.

ROYAL BAKING POWDER
Absolutely Pure.
This powder never varies. A marvel of purity, strength and wholesomeness. More economical than the ordinary kinds and can not be sold in competition with the multitude of low-test short rights, alums or phosphate powders. Sold only in cans. Royal Baking Powder Co. 106 Wall Street, New York.
